DVD Duplicators

Organizations need to publish CDs, DVDs, or blu-ray. There are several products from many reputable companies such as Octave, Primera, Cd-Writer, to buy these goods from. The duplicators are often classed into robotic or manual stand alone towers. Stand alone towers can offer larger through puts, lower cost, and smaller foot prints. Most towers duplicators do not have the ability to print, require manual operation, and often require masters disc to be loaded in or loaded onto an internal hard disk drive. Automated Robotic duplicators offer hands free operation, and often the ability to print and burn a disc. Robotic duplicators are more expensive. This larger expense is often off set by the labor cost savings. Check out Octave for a DVD Duplicator .
